PROTECTIVE VISORS

FOR MULTIPLE USE

COVER ONE

The CoverOne protective visor can be used as a complementary element of protective clothing, which can reduce the risk of droplet-borne infections. It also protects the mucous membranes of the lips, eyes and nose from contact with contaminated hands or objects as well as small mechanical injuries.

The size is universal, adapted to the size of the head with a tape. Visor is made of polyethylene with very high transparency - up to 92%. High scratch resistance and able to be cleaned with anti-bacterial chemicals.

- easy to maintain
- ergonomic shape
- lightweight and convenient to use, does not burden the spine
- durable
- made of high quality transparent and durable plastics
